Program	Digital Marketing Internship
Task	Task 5 – A/B Testing for Video Ads

Confidential | For Internship Submission Only

1. Introduction

This project focuses on creating and analyzing two different advertisement variations for the CareerBoost Learning App. The objective is to compare ad performance using simulated campaign metrics and identify the most effective advertising strategy through A/B testing.

2. Project Objective

The objective of this project is to design two advertisement variations, compare their performance using key marketing metrics, and determine which advertisement generates better audience engagement and conversion potential.

3. Campaign Overview

Product / Service

CareerBoost Learning App

Target Audience

- TNPSC Aspirants
- SSC CGL Aspirants
- College Students
- Spoken English Learners

Campaign Goal

Generate student interest and increase learning app registrations.

4. Ad Variation A

The advertisement for the CareerBoost Learning App features a vibrant design. At the top left is the CareerBoost logo with the tagline 'LEARNING APP'. To the right, a blue banner states 'Trusted by 10,000+ Students' with five stars. The main headline 'CRACK TNPSC & SSC FASTER!' is prominently displayed in large, bold, blue and white letters, accompanied by a rocket icon. Below this, the tagline 'Your Success, Our Mission' and the slogan 'Smart Learning Today, Bright Future Tomorrow!' are shown. A smiling woman holding a book titled 'DREAM PREPARE SUCCEED' is featured on the right. The bottom section lists four key features: 'MOCK TESTS' (exam-oriented tests with analytics), 'DAILY QUIZZES' (practice daily to improve concepts), 'SPOKEN ENGLISH PRACTICE' (enhance speaking skills with confidence), and 'SMART STUDY SUPPORT' (notes, videos, and expert guidance anytime, anywhere). A yellow button with 'START LEARNING TODAY!' and a right arrow is positioned below these features. To the right of the button is a white box with the text 'Learn Anytime, Achieve Anywhere!'. The footer contains four icons and their corresponding benefits: 'Trusted Content' (shield icon), 'Expert Faculty' (person icon), 'Learn on Mobile' (mobile phone icon), and 'Track Your Progress' (bar chart icon).

Ad A Details

Headline	Crack TNPSC & SSC Faster!
Call-to-Action	Start Learning Today
Focus	Exam success, mock tests, daily quizzes, study support

5. Ad Variation B

CareerBoost
LEARNING APP
Smart Learning. Bright Future.

BOOST YOUR LEARNING JOURNEY EVERY DAY!

Learn anytime, anywhere!

Quality Study Material, Expert Guidance & Smart Practice - All in One App!

Get Access to **FREE Resources!**

- Study Notes
- Practice Tests
- Video Lessons
- Weekly Quizzes

EXAM FOCUSED
Specialized for TNPSC, SSC & other competitive exams.

EXPERT CONTENT
Well-structured study material by experts.

TRACK PROGRESS
Smart progress tracking to improve your preparation.

24X7 SUPPORT
Get your doubts cleared anytime by experts.

SAFE & SECURE
100% safe learning environment for all students.

PERFECT FOR

- TNPSC Aspirants
- SSC CGL Aspirants
- College Students
- Spoken English Learners
- Any Competitive Exam

Figure 2: Ad Variation B – Boost Your Exam Preparation Today!

Ad B Details

Headline	Boost Your Exam Preparation Today!
Call-to-Action	Join Free Demo
Focus	Awareness, free resources, learning support

6. A/B Testing Methodology

A/B testing was conducted by creating two advertisement versions with different headlines, messaging styles, and call-to-action buttons. The performance of each variation was evaluated using key marketing metrics including click-through rate, watch time, engagement, and audience interaction.

7. Performance Comparison Table

Metric	Ad A – Start Learning Today	Ad B – Join Free Demo
CTR	8.5%	6.8%
Watch Time	24 seconds	18 seconds
Engagement Rate	12%	9%
Likes / Interactions	210	165
Shares	45	28
Conversion Potential	High	Medium

Table 1: A/B Testing Performance Comparison

8. Campaign Analysis Report

The purpose of this campaign was to promote the CareerBoost Learning App among students preparing for competitive examinations such as TNPSC and SSC CGL. Two advertisement variations were created and compared using A/B testing techniques to identify the most effective campaign strategy.

Ad A used the headline "Crack TNPSC & SSC Faster!" with the call-to-action "Start Learning Today." This advertisement focused on urgency, exam success, and immediate action. Ad B used the headline "Boost Your Exam Preparation Today!" with the call-to-action "Join Free Demo." This advertisement focused on awareness and encouraging students to explore the platform.

Based on the performance comparison, Ad A achieved a higher click-through rate, longer watch time, and better engagement levels than Ad B. The strong exam-focused messaging and direct call-to-action attracted more student interest and generated higher interaction rates.

Ad B also performed well in creating awareness and introducing the learning platform to new users. However, its engagement and conversion potential were comparatively lower than Ad A.

The A/B testing results indicate that direct, action-oriented messaging is more effective for educational marketing campaigns. Therefore, Ad A is recommended for future campaign implementation as it demonstrated stronger audience engagement and higher conversion potential.

Overall, the campaign successfully demonstrated how AI-assisted analysis and A/B testing can be used to optimize digital marketing performance and improve decision-making.

9. Key Findings

The results indicate that Ad A outperformed Ad B across most performance metrics. The exam-focused messaging and stronger call-to-action generated higher engagement and audience interest. Ad B successfully created awareness but produced lower interaction levels compared to Ad A.

10. Suggested Improvements

- Use stronger student success visuals.
- Add testimonials from successful learners.
- Increase CTA visibility.
- Experiment with shorter video formats for social media platforms.
- Include limited-time offers to improve conversion rates.

11. Bonus Activity – CTA Testing Strategy

CTA A	Start Learning Today
CTA B	Join Free Demo

The purpose of this test was to determine which CTA generated higher engagement and user interest. Results showed that CTA A (Start Learning Today) performed better than CTA B. The direct and action-oriented message encouraged students to take immediate action, resulting in higher click-through rates and engagement levels. CTA B attracted users interested in exploring the platform through a free demo, but its overall interaction rate was lower than CTA A. Based on the analysis, CTA A is recommended for future educational marketing campaigns due to its stronger conversion potential and audience response.

12. Conclusion

The project successfully demonstrated the application of AI-assisted A/B testing in digital advertising. By comparing two advertisement variations, valuable insights were obtained regarding audience behavior, engagement, and campaign effectiveness. Ad A was identified as the stronger-performing campaign and is recommended for future implementation.
