

SmartLearn Academy

AI Lead Generation Chatbot

Submitted By:

S.P. Ashwatha

Internship Program:

Digital Marketing Internship

1. Introduction

The SmartLearn Academy AI Lead Generation Chatbot is designed to assist educational institutions in collecting student enquiries, answering frequently asked questions, and managing lead information efficiently. The chatbot automates the process of capturing student details such as name, email, and course interest while providing instant responses to common questions. The collected data is stored in Google Sheets and managed through a CRM system using Notion and Zapier automation.

2. Project Objective

The objective of this project is to create an AI-powered chatbot capable of collecting student leads, answering FAQs, classifying lead quality, and automatically storing information for follow-up and marketing purposes.

3. Flowchart

The flowchart below illustrates the complete workflow of the SmartLearn Academy AI Lead Generation Chatbot, from initial student interaction through to data storage and CRM management.

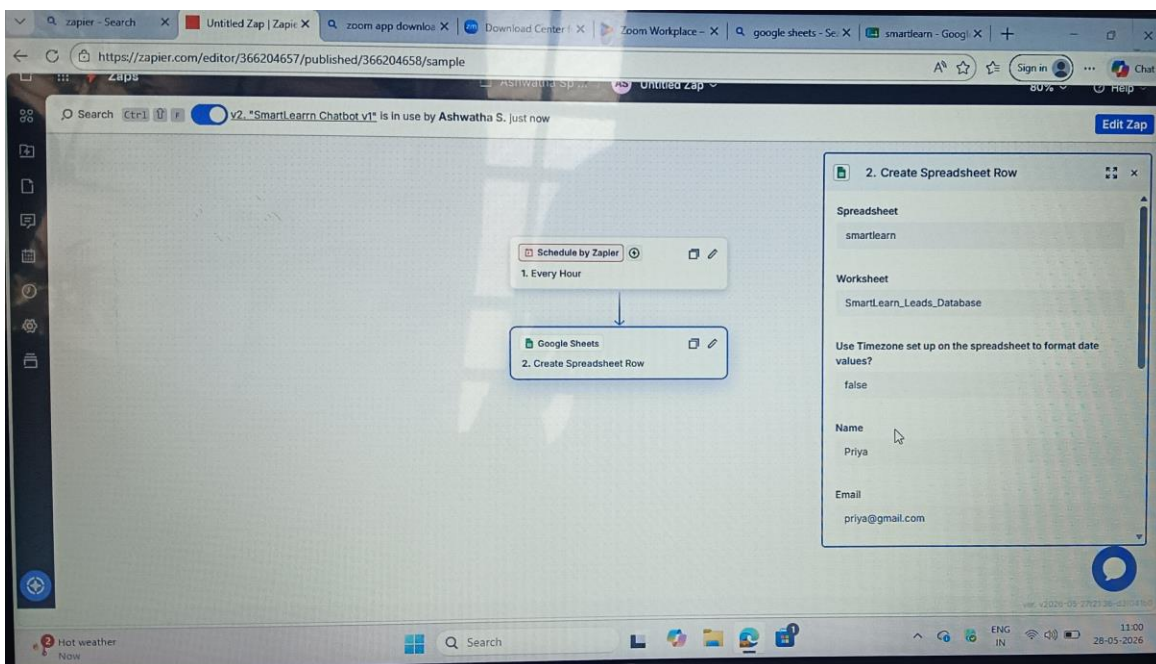

Figure 1: SmartLearn Academy Chatbot Workflow

4. Chatbot Conversation Script

The following section presents 10 simulated chatbot conversation examples demonstrating how the SmartLearn Academy AI chatbot interacts with prospective students across different enquiry types.

Conversation 1: Fee Enquiry	
Bot	Hi! Welcome to SmartLearn Academy. How can I help you today?
Bot	May I know your name?
User	Priya
Bot	Nice to meet you, Priya. Please enter your email ID.
User	priya@gmail.com
Bot	Which course are you interested in?
User	TNPSC
User	What is the course fee?
Bot	Our TNPSC course starts at approximately Rs.1500 and includes study materials and mock tests.
User	How can I enroll?
Bot	You can enroll through our admission team or join a free counseling session.
Lead Score	HOT

Conversation 2: Timing Enquiry	
Bot	Welcome to SmartLearn Academy.
Bot	Please enter your name.
User	Rahul
Bot	Please enter your email ID.
User	rahul@gmail.com
Bot	Which course are you interested in?
User	SSC CGL
User	What are the timings?
Bot	We provide both morning and evening batches for flexibility.
User	Okay, I'll think about it.
Lead Score	WARM

Conversation 3: Demo Class Enquiry

Bot	Welcome to SmartLearn Academy.
User	Meena
Bot	Please enter your email ID.
User	meena@gmail.com
Bot	Which course are you interested in?
User	Spoken English
User	Is a demo class available?
Bot	Yes! A free demo class is available for all new students.
User	Sounds good.
Lead Score	WARM

Conversation 4: Casual Browsing

Bot	Welcome to SmartLearn Academy.
User	Karthik
Bot	Please enter your email ID.
User	karthik@gmail.com
Bot	Which course are you interested in?
User	Aptitude
User	Just checking available courses.
Bot	No problem. Feel free to explore our courses anytime.
Lead Score	COLD

Conversation 5: Admission Ready

Bot	Welcome to SmartLearn Academy.
User	Asha
Bot	Please enter your email ID.
User	asha@gmail.com
Bot	Which course are you interested in?
User	TNPSC
User	I want to join immediately.
Bot	Great! Our admission team will guide you through registration and batch details.
Lead Score	HOT

Conversation 6: Course Duration Question

Bot	Welcome to SmartLearn Academy.
User	Naveen
Bot	Please enter your email ID.
User	naveen@gmail.com
Bot	Which course are you interested in?
User	SSC
User	How long is the course?
Bot	Most courses take around 3 to 6 months depending on preparation level.
Lead Score	WARM

Conversation 7: Syllabus Enquiry

Bot	Welcome to SmartLearn Academy.
User	Divya
Bot	Please enter your email ID.
User	divya@gmail.com
Bot	Which course are you interested in?
User	TNPSC
User	What subjects are covered?
Bot	History, Geography, Economy, Polity, Science, Aptitude, and Current Affairs are included.
Lead Score	WARM

Conversation 8: Fee and Admission Enquiry

Bot	Welcome to SmartLearn Academy.
User	Harini
Bot	Please enter your email ID.
User	harini@gmail.com
Bot	Which course are you interested in?
User	Spoken English
User	What is the fee and how do I join?
Bot	Course fees vary, and enrollment can be completed through our admissions process.
User	Okay, I want the details.
Lead Score	HOT

Conversation 9: Comparing Options	
Bot	Welcome to SmartLearn Academy.
User	Vishnu
Bot	Please enter your email ID.
User	vishnu@gmail.com
Bot	Which course are you interested in?
User	Aptitude
User	Are online classes available?
Bot	Yes, both online and offline learning options are available.
User	I'm comparing institutes.
Lead Score	WARM

Conversation 10: General Curiosity	
Bot	Welcome to SmartLearn Academy.
User	Keerthi
Bot	Please enter your email ID.
User	keerthi@gmail.com
Bot	Which course are you interested in?
User	Other
User	What courses do you provide?
Bot	We provide TNPSC, SSC, Spoken English, Aptitude, and exam preparation programs.
User	Okay, just browsing.
Lead Score	COLD

5. Lead Scoring Logic

The chatbot classifies leads into three categories based on the nature of the student enquiry:

Category	Trigger Criteria
HOT Lead	Students asking about admission, fees, enrollment, or demo classes.

WARM Lead	Students requesting course information, syllabus details, or schedules.
COLD Lead	Students casually browsing or seeking general information.

6. Google Sheets Integration

Student information collected by the chatbot is automatically stored in Google Sheets. The sheet contains details such as Name, Email, Course Interest, Lead Score, and Status.

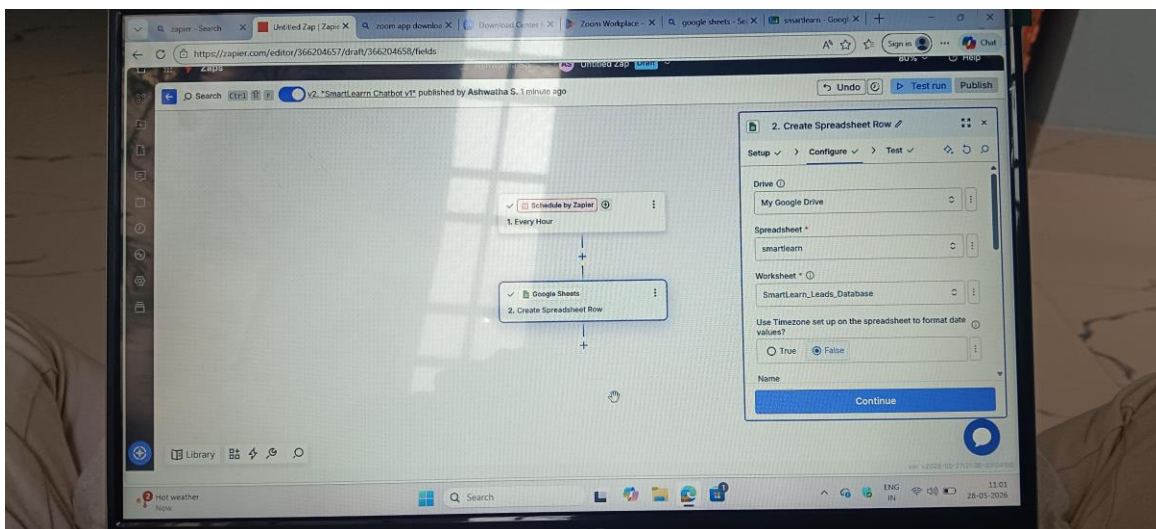

Figure 2: Google Sheets Integration — SmartLearn Leads Database

7. Zapier Automation

Zapier is used to automate data transfer between the chatbot system and Google Sheets/CRM platforms. The automation runs on a scheduled trigger and creates a new spreadsheet row for each student lead captured.

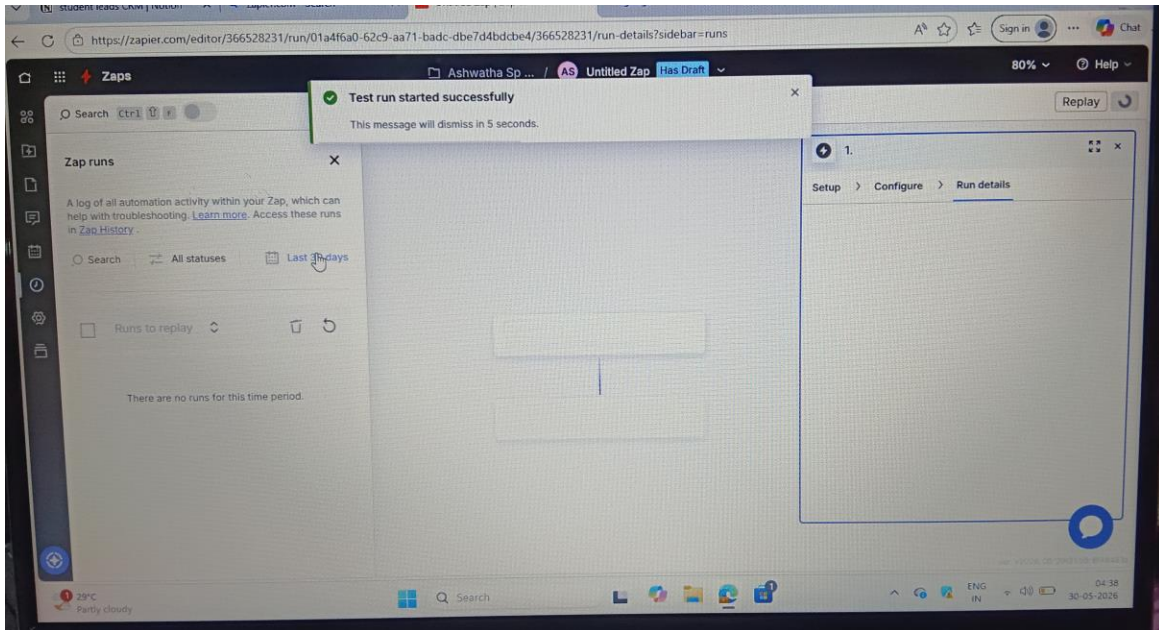

Figure 3: Zapier Automation — Test Run Started Successfully

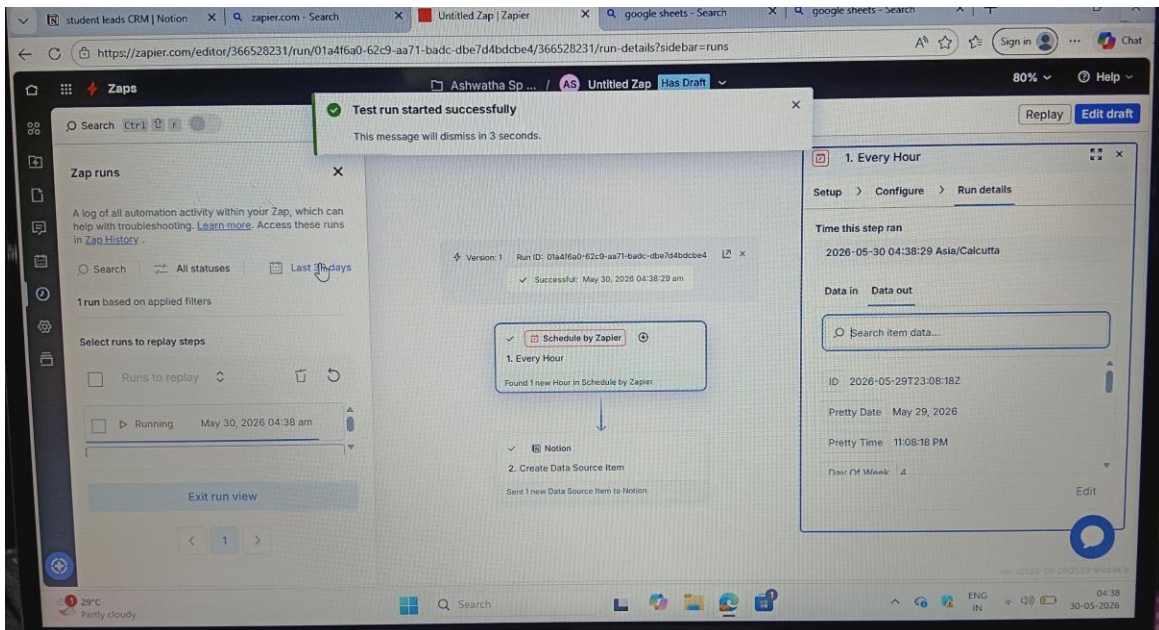

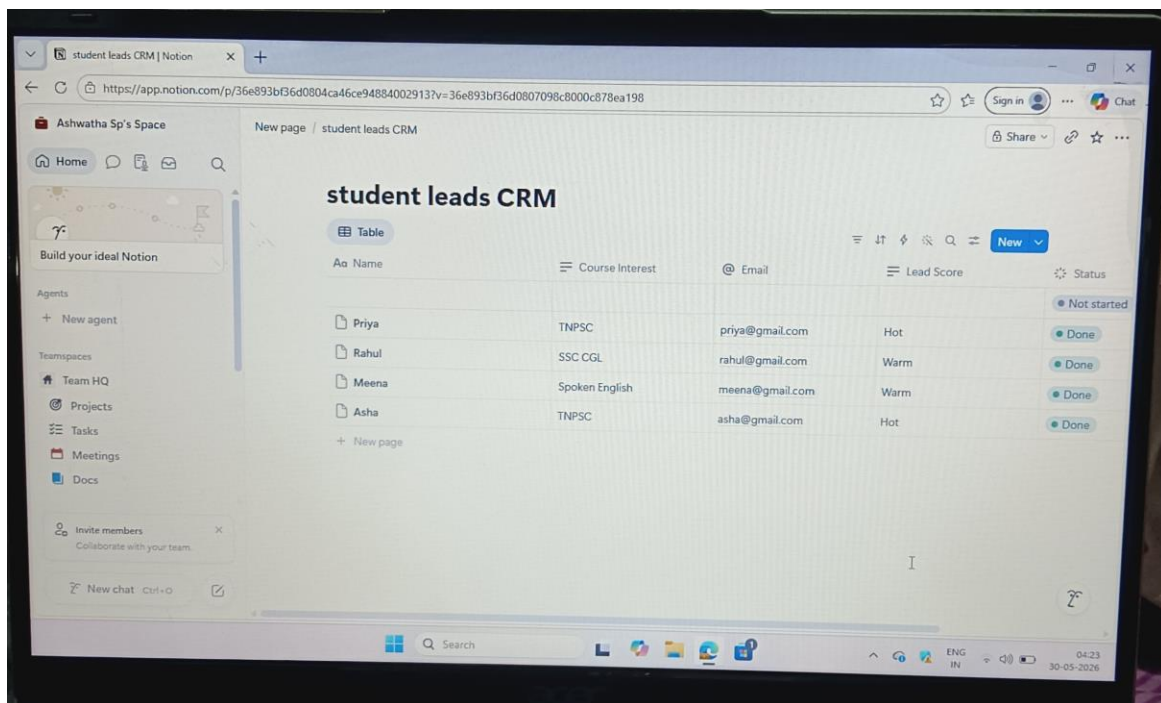

Figure 4: Zapier Automation — Successful Run with Notion Integration

8. Notion CRM Integration

Notion CRM is used to organize and manage student leads for follow-up activities. Lead information can be tracked and updated efficiently within the CRM database. The table view displays Name, Course Interest, Email, Lead Score, and Status for each student.

The screenshot shows a Notion workspace titled 'Ashwatha Sp's Space' with a new page 'student leads CRM'. The database is a table with columns: Name, Course Interest, Email, Lead Score, and Status. It contains four entries: Priya (TNPSC, Hot, Not started), Rahul (SSC CGL, Warm, Done), Meena (Spoken English, Warm, Done), and Asha (TNPSC, Hot, Done). The interface includes a sidebar with navigation options like Home, Agents, Teamspaces, and a bottom taskbar with system icons and date/time.

Name	Course Interest	Email	Lead Score	Status
Priya	TNPSC	priya@gmail.com	Hot	Not started
Rahul	SSC CGL	rahul@gmail.com	Warm	Done
Meena	Spoken English	meena@gmail.com	Warm	Done
Asha	TNPSC	asha@gmail.com	Hot	Done

Figure 5: Notion CRM — Student Leads Database

9. Results and Benefits

The chatbot successfully delivers the following outcomes:

- Automates lead collection and FAQ handling, reducing manual workload
- Integration with Google Sheets and Notion CRM improves data management and organization
- Enables faster responses to student enquiries through instant automated replies
- Supports effective lead tracking and follow-up through structured CRM management
- Lead scoring system (Hot, Warm, Cold) enables prioritized outreach by the admissions team

10. Conclusion

The SmartLearn Academy AI Lead Generation Chatbot demonstrates how AI and automation tools can improve student enquiry management. By integrating chatbot interactions with Google Sheets, Zapier, and Notion CRM, the project provides an efficient system for collecting and managing educational leads. This solution enables SmartLearn Academy to respond faster to

prospective students, reduce manual data entry, and maintain a well-organized pipeline of student leads for effective follow-up.
